

PEEEL AUDIOLOGY & HEARING AID SERVICES

When you refer your patients to us they receive the highest standard of hearing health care:

1. Lynne Burdett and Janet Michaud have been providing Audiological Services in Brampton since 1989. We spent many years running the audiology department at Peel Memorial Hospital and have been at our current location, Peel Audiology since 1996.
2. We test all ages including newborns. Based on our extensive pediatric experience we were chosen as the sole diagnostic site for the Ontario Infant Hearing Program in the North Peel region.
3. We are not owned by a hearing aid manufacturer. We are therefore able to provide the best solution for the patient's individual needs.
4. Patients are always seen by one of our three qualified audiologists for testing, hearing aid prescriptions and fitting. Audiologists are highly trained individuals with a University Masters degree. None of these functions are performed by auxiliary staff or assistants.
5. Comprehensive assessments are given to all patients. Ample time is allotted to each patient to ensure their individual needs are addressed.
6. Results of all assessments are forwarded to the referring physician.
7. We offer Communication Workshops to all patients who move forward with amplification. This optimizes patient outcomes as patients are taught how to use their devices and the communication strategies needed to be successful.
8. Before a patient decides to go ahead with a trial period with amplification we demonstrate the hearing aids so they can make an informed decision.
9. A comprehensive care plan is offered with all hearing aid purchases which includes batteries, parking reimbursement and all office visits for 3 years.
10. We provide excellent Audiological services at very competitive rates. Our approach is to educate and advise patients of the solution that best suits their budget and lifestyle.
